

The screenshot displays a web browser window with the address bar showing the URL: `creatorapp.zoho.in/sainadh.pappireddy/car-booking-reservation-system/#Formbook_a_cab`. The browser's top navigation bar includes the text "Car Booking Reservation System" and a "Trial expires in 15 days Upgrade" link. The main content area is titled "book a cab" and contains a form with the following fields:

- Name:** Two input fields for "First Name" and "Last Name".
- Email:** A single input field with an email icon.
- Phone:** A single input field with a country code dropdown set to "+91" and the number "81234 56789".
- Date-Time:** A single input field with a date icon.
- Multi Select:** A dropdown menu with the text "-Select-".
- Drop Down:** A dropdown menu with the text "-Select-".
- Time:** A single input field with a clock icon.
- Address:** Two input fields for "Address Line 1" and "Address Line 2".
- City / District:** A single input field.
- State / Province:** A single input field.
- Postal Code:** A single input field.
- Country:** A dropdown menu with the text "-Select-".

The browser's bottom status bar shows the temperature "86°F Mostly cloudy" and system icons. The top navigation bar also includes a "book a cab Report" link.

Experiment 4:-

Aim: To create a simple cloud software application for car booking reservation system using SaaS

Requirements:

Zoho/ Azure/ sales force

Procedure:

1. Register for Zoho with Gmail
2. Create an application from scratch
3. Edit open form builder & drag the needed options
4. Give the details name, Email, id, Mobile Number, Gender, Booking date, travel state, Pickup time, Pickup address, destination Address.
5. Fill the data using Access & collect the data needed.
6. Enter the Pickup time & Pickup Address Accurately,
7. The destination Address should be provided
